PROFESSIONAL SUMMARY

Working in backend development at ZopDev, a B2B cloud SaaS startup. Strong foundation in Java, Data Structures & Algorithms and System Design. Primary contributor to two production systems, the Content Engine and Signals. Comfortable with Postman, GitHub and AI tools like Claude, ChatGPT and Gemini, and skilled in prompt engineering. Brings a business mindset too, thinking about users and impact, not just code.

SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL

Backend: Spring Boot, Spring Data JPA, FastAPI, Node.js, REST APIs, JUnit

Databases: PostgreSQL, MySQL, Redis

Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, System Design

AI: Prompt engineering, LLM APIs (Anthropic, OpenAI, Gemini), Claude, ChatGPT, Claude Code

Tools: Git, GitHub, Postman, Docker, CI/CD (GitHub Actions), Vercel

EXPERIENCE

Cloud Associate (Backend Development) | Apr 2026 – Present
ZopDev — B2B cloud SaaS startup · Bangalore

- Primary contributor to the Content Engine, ZopDev's production LLM content pipeline (see Projects), in a lean team of 4–6 engineers.
- Design backend services, data models and API contracts; validate every external and AI response with schemas (Zod, Pydantic) so bad data fails early instead of breaking later steps.
- Write and tune prompts for LLM features, test APIs with Postman, and ship through GitHub with code review and CI/CD.

Cloud Executive | Nov 2025 – Apr 2026
ZopDev · Bangalore

- Built the data-collection layer of Signals (see Projects) and worked on its PostgreSQL schema, migrations and connection pooling.

PROJECTS

Content Engine · ZopDev | *TypeScript (Bun), Anthropic / OpenAI / Gemini APIs, Zod*

- LLM pipeline that turns one draft into blogs, social posts, ebooks and newsletters, through research, planning, writing, rendering and validation steps.
- Owned the rendering layer: one markdown source creates every output format, so all channels stay consistent.
- Added hash-based caching so re-runs skip unchanged steps and avoid repeat LLM calls; worked on quality checks (facts, voice, SEO) that send weak sections back for rewriting.

Signals · ZopDev | *Python 3.12, FastAPI, PostgreSQL, Redis, Playwright*

- Platform that collects buying signals from job boards, news and community sites and scores target companies for the sales team.
- Owned the data-collection layer, with Playwright as a fallback for JavaScript-heavy pages; built the review web page that shows ranked company lists; tracks a 1,000-company watchlist.

B2B Sales CRM with AI Lead Summarizer | *Java 21, Spring Boot 3, PostgreSQL, JPA, Gemini API, JUnit*

- Lead search, activity timeline, deal pipeline and follow-up tasks in a layered Controller, Service and Repository design, with validation on every write.
- AI lead summaries use a fixed Gemini response schema; missing details are worked out in code so the model cannot invent them, with a rule-based fallback. Tested with JUnit.

EDUCATION & CERTIFICATIONS

Chitkara University — B.E. Computer Science Engineering (CGPA 8.0) · 2022 – 2026
GGMSSS Chandigarh — Class XII, CBSE (74.8%, 2022) · AKSIPS 45 — Class X, CBSE (80.4%, 2020)
Certifications: Cloud, Data Engineering & DevOps (Coursera) · Python (Coding Ninjas) · Google Analytics (Google)
